

Trend Micro™

Data Protection Pack

Secure email and prevent the loss of sensitive data

Maintaining privacy of information and complying with regulations has become increasingly challenging for IT who must address both threats and compliance requirements with limited resources. Now you no longer have to rely on point solutions that address only individual aspects of security or compliance. Trend Micro™ Data Protection Pack for NeatSuite™ Advanced and Client/Server/Messaging Suite secures email and prevents the loss of sensitive data on and off the network by bundling Trend Micro Leak Proof™ Standard, Trend Micro Email Encryption Gateway, and Trend Micro Message Archiver. It protects data in transit and at rest, and secures customer data and intellectual property across multiple threat vectors including email, webmail, IM, USB and CDs/DVDs. The Data Protection Pack makes it easy and cost-effective to secure private information and enable compliance with security, data protection and e-discovery laws, as an addition to our comprehensive security suites.

DATA PROTECTION PACK COMPONENTS

Trend Micro LeakProof Standard protects sensitive data in use, at rest and in motion.

- Secures sensitive data and protects privacy through the discovery, monitoring, blocking and encrypting of private or sensitive data with real-time views of endpoint status
- Performs high-performance, low-impact filtering based on keywords, meta data and regular expressions
- Provides granular policy enforcement by Active Directory user or group, Windows domain, and endpoint groups
- Filters and controls input/output devices: USB, CD/DVD, IrDA, Bluetooth, COM and LPT ports, and more

Trend Micro Email Encryption Gateway provides policy-based encryption to protect intellectual property and help achieve compliance.

- Secures email delivery from gateway to desktop recipient
- Automatically encrypts and decrypts emails based on administrator-defined policies
- Identity-based encryption eliminates the burdens of Public Key Infrastructure technology
- Virtual appliance form factor minimizes cost of ownership and optimizes resource utilization

Trend Micro Message Archiver securely stores email for e-discovery, compliance and storage management.

- Optimized mail system reduces email storage and management costs
- Tamper-resistant forensic design supports compliance and e-discovery
- Self-service search capability increases employee productivity
- Data Guardian transcripts safeguard employee privacy

SOFTWARE

Threat Protection

- Data loss
- Insider threats: malicious and accidental
- Regulatory compliance
- Electronic discovery
- Intellectual property protection

KEY BENEFITS

- Combines email archiving, email encryption and data loss prevention into a cost-effective package
- Secures private information and enables compliance with security, data protection, and e-discovery laws
- Avoids pitfalls of other point solutions that are complex, more costly to acquire and manage and require extensive professional services to deploy

SECURES EMAIL

Data Protection Pack ensures that your email communications will be kept private and protected for compliance and e-discovery.

- Email Encryption Gateway prevents unauthorized access to sensitive email messages and attachments.
- Message Archiver protects email records for compliance, e-discovery, and information management.
- LeakProof ensures sensitive documents are not sent via email.

PROTECTS SENSITIVE DATA

Data Protection Pack protects sensitive data on and off the network and during email transmission.

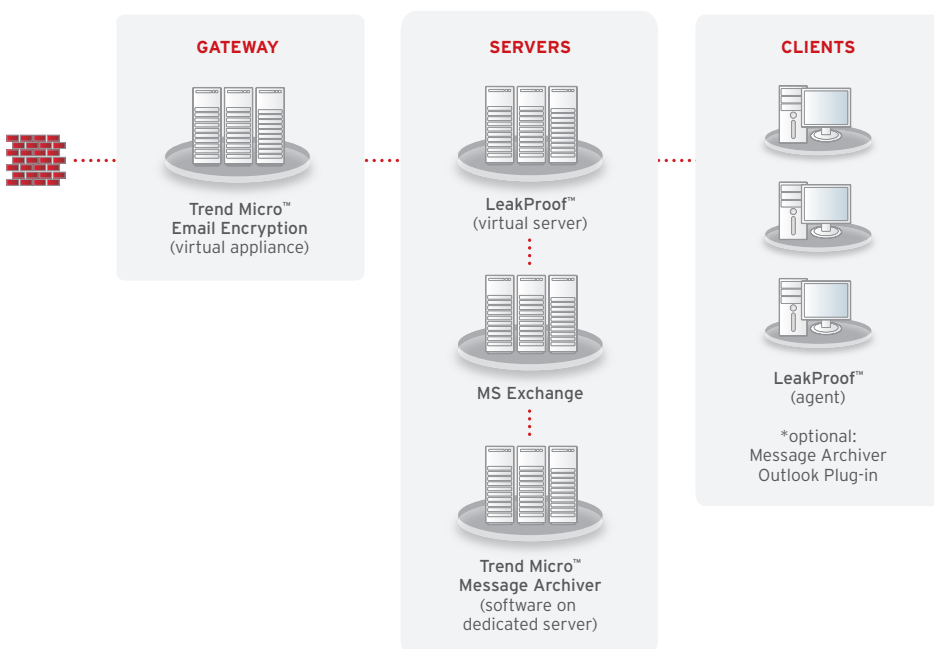

- Leak Proof protects customer and employee data as well as intellectual property on and off the network and across multiple threat vectors, including email, webmail, IM, USB and CDs/DVDs at its most vulnerable point: the endpoint.
- Email Encryption Gateway provides policy-based encryption to protect intellectual property and to help achieve regulatory compliance. It integrates with existing messaging security infrastructure.
- Message Archiver captures email records in a tamper-resistant archive, providing an audit trail of all activity.

MINIMUM SYSTEMS REQUIREMENTS

For the latest system requirements please refer to the **Data Protection Pack product page** at:
